

COPC® Best Practices for Customer Experience Operations, Release 7.0

Achieve High Performance

For more than two decades, COPC Inc. has been the global leader in helping clients optimize their customer experience operations to achieve consistent high-performance success. We developed the premier performance management system tailored to the contact center industry, the COPC Customer Experience (CX) Standard, and it remains the ever-evolving industry standard for performance improvement excellence.

Hundreds of the highest-performing operations around the globe utilize the COPC CX Standard in their daily operations. Why? Because it equips them with the most effective management strategies in four key areas of contact center operations: Leadership & Planning, Processes, People and Performance. When properly implemented, these strategies deliver what every contact center operation is after: improved performance, increased customer satisfaction and lower costs.

COPC® Best Practices for Customer Experience Operations

COPC Best Practices for Customer Experience (CX) Operations is a rigorous, in-depth course built around the guidelines and best practices set forth within the COPC CX Standard, Release 7.0. Course participants will learn how to implement the COPC CX Standard, Release 7.0 and best manage a high-performing, world-class customer experience operation, increasing both customer satisfaction and bottom-line growth. This class is ideal for organizations servicing customers through one or more channels, including contact centers, chat, mobile, social media, digital and in-person. Our COPC Best Practices for CX Operations training course is available online, in-person and live virtually. We also offer dedicated sessions that can be tailored to your organization's needs.

Benefits of BPCX Training:

- Gain expertise to meet or exceed high-performance goals and achieve continuous improvement within your contact center operations
- Obtain better insight into key drivers of the customer experience through a structured approach to customer feedback
- Achieve greater uniformity across all channels of support, including both human assisted and digital assisted channels
- Implement more efficient and effective customer experience operations, resulting in reduced errors, improved CSAT and lower costs
